INPHA WEBSITE DESIGN PRESENTATION

Helping children grow. Helping businesses grow.

UX direction, wireframes and high-fidelity UI for inpha.in — presented for approval before any development begins.

01 OUR UNDERSTANDING OF INPHA

One team. Two connected lines of work.

School & Student Services — main line

School Policy Development · Teacher Training · School Campus & Environment Setup · Summer Camp · Winter Camp · Specialized Workshops & Awareness Sessions

Tech & Creative Services

App Development · Web Development · Video Editing · Graphic Design · Logo Design · Social Media Template Design & Campaign Management [wording to confirm]

Delivery is on-ground and online. Facilities: end-to-end consultation, follow-up support, and one team instead of multiple vendors. Every statement here comes from the brief.

02 AUDIENCES AND WHAT THEY NEED

Three visitors, three questions.

School management & principals

"Can I rely on this partner?" Needs: policy, teacher training, campus setup, process, verified past work.

Parents & students

"Is it safe and good for my child?" Needs: camps and workshops, ages, safety and supervision, real photos, easy contact.

Businesses & startups

"Can one team handle my brand?" Needs: app, web, creative, social media; portfolio proof; a project enquiry.

Because most parents and schools use phones, mobile is designed first, with WhatsApp always one tap away.

03 VISUAL DIRECTION: THE FIELD NOTEBOOK

Practical, outdoors, trustworthy, not "tech template".

Why this idea

Both sides of INPHA are hands-on: camps, classrooms, workshops and real client projects. The identity borrows from planning notebooks and trail markings.

Signature details

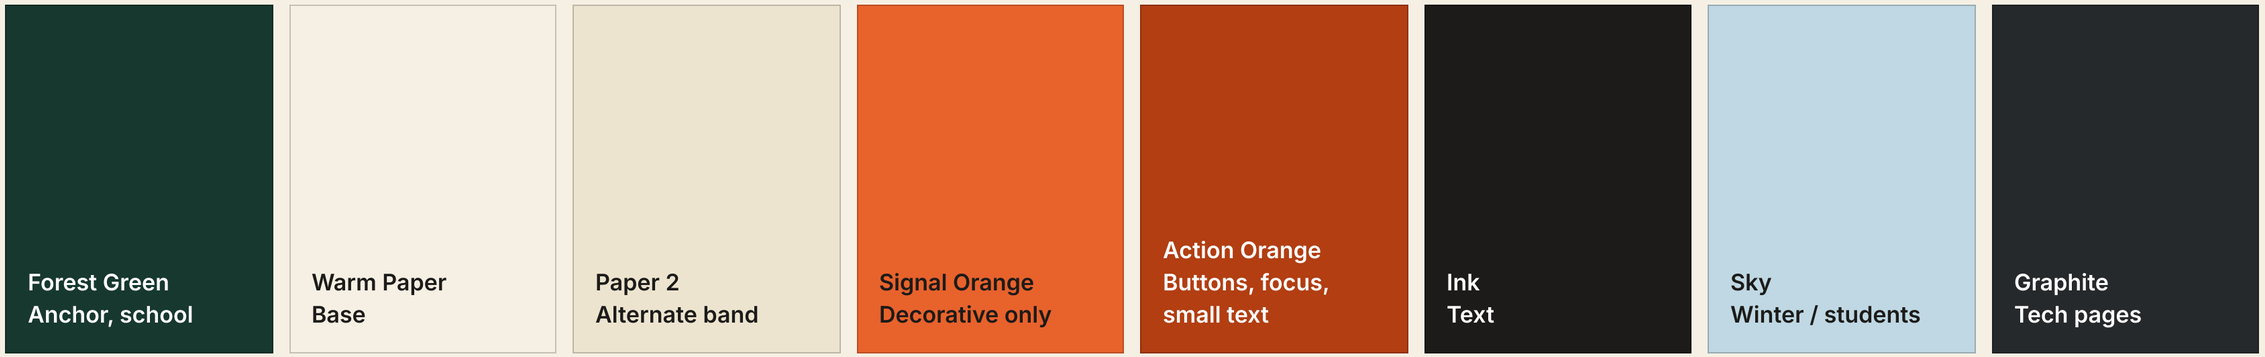

Index tabs (04 · School Care), a dotted "route" line that links steps, paper grain, hairline rules, square-ish 4px corners.

What we avoided

Purple gradients, glass cards, blobs, identical rounded card grids, fake dashboards, stock photo filler.

04 COLOUR PALETTE AND TYPOGRAPHY

Colour with a job; type that speaks Hindi too.

Fraunces — headings

Inter — body and UI

हिंदी शीर्षक — Noto Serif

हिंदी पाठ — Noto Sans Devanagari, line height 1.7

05 SITEMAP AND USER JOURNEYS

14 pages. Three clear paths.

HOME
1 Home

COMPANY
2 About · 11 Team · 13 Why INPHA

SERVICES
3 Overview · 4 School Care · 5 Student Programs · 6 Tech Solutions → 7 App & Web · 8 Creative · 9 Social Media

PROOF & CONTACT
10 Portfolio · 12 Blog · 14 Contact · Footer: Privacy, Terms, 404

A. Schools

Home → School Care → Approach → Verified work → School enquiry

B. Parents

Home → Student Programs → Safety shown early → Photos → WhatsApp / enquiry

C. Businesses

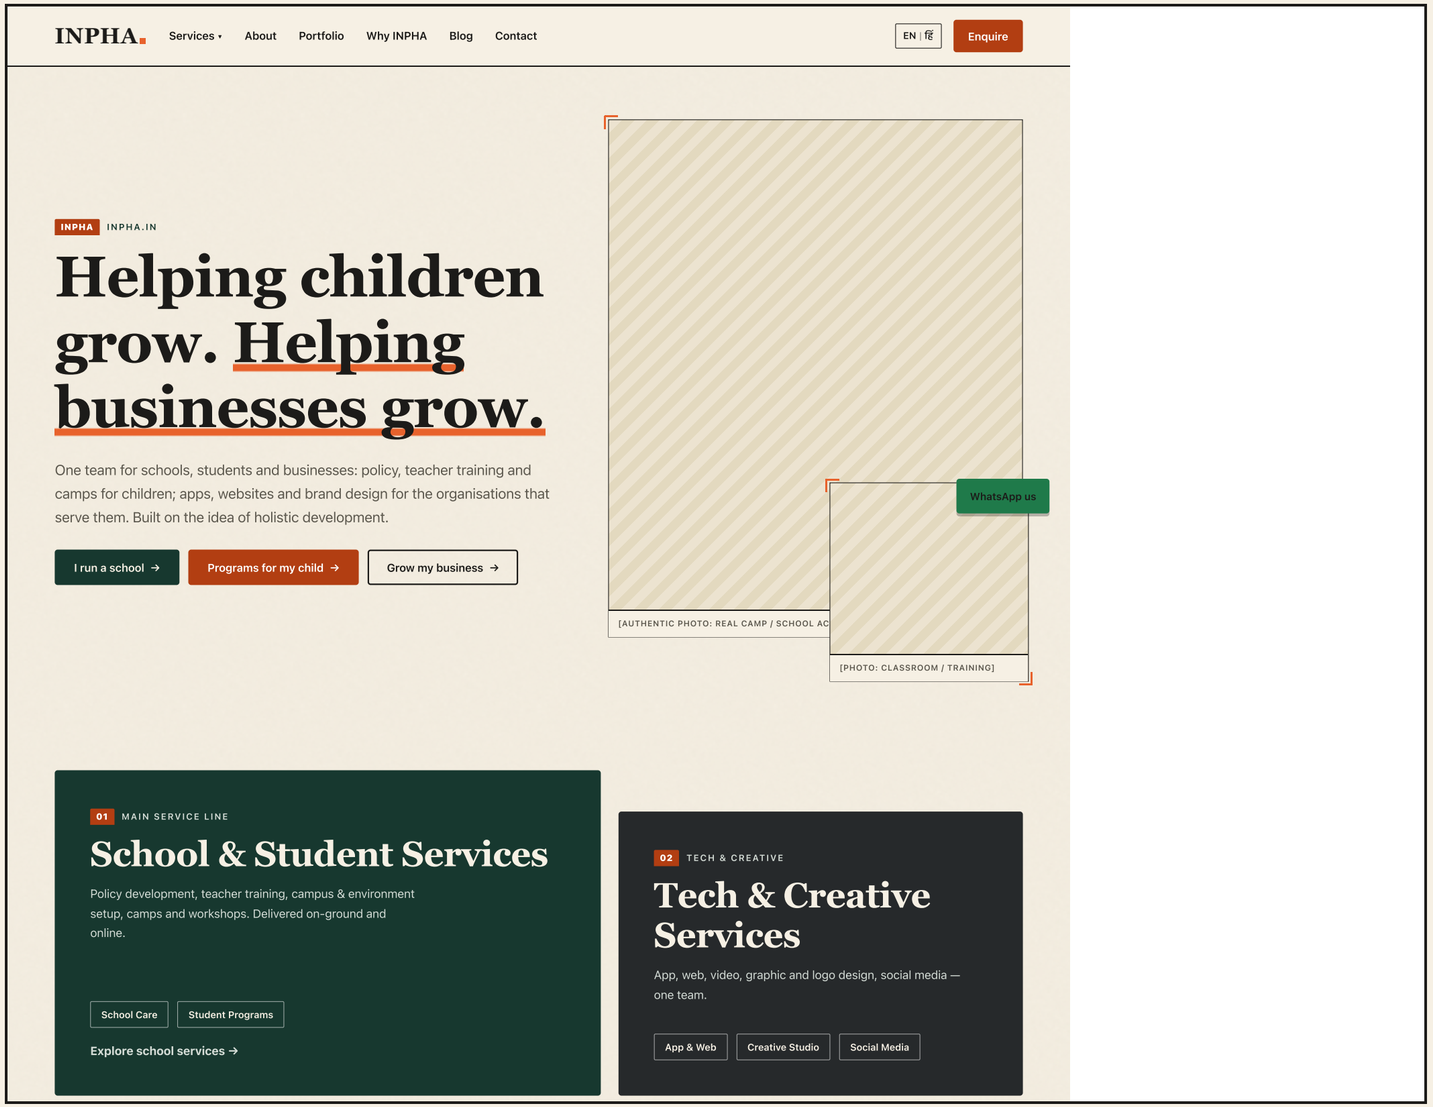

Home → Tech Solutions → Service page → Filtered portfolio → Project enquiry

06 HOME PAGE CONCEPT

Two doors, School first.

The hero introduces children and business under one idea. Two entry doors split the visitor at once, and the School door is larger, because it is the main service line.

Then: all services, School Care feature, reasons to choose INPHA, featured work, testimonials, blog and enquiry options. Numbers and testimonials are placeholders until verified.

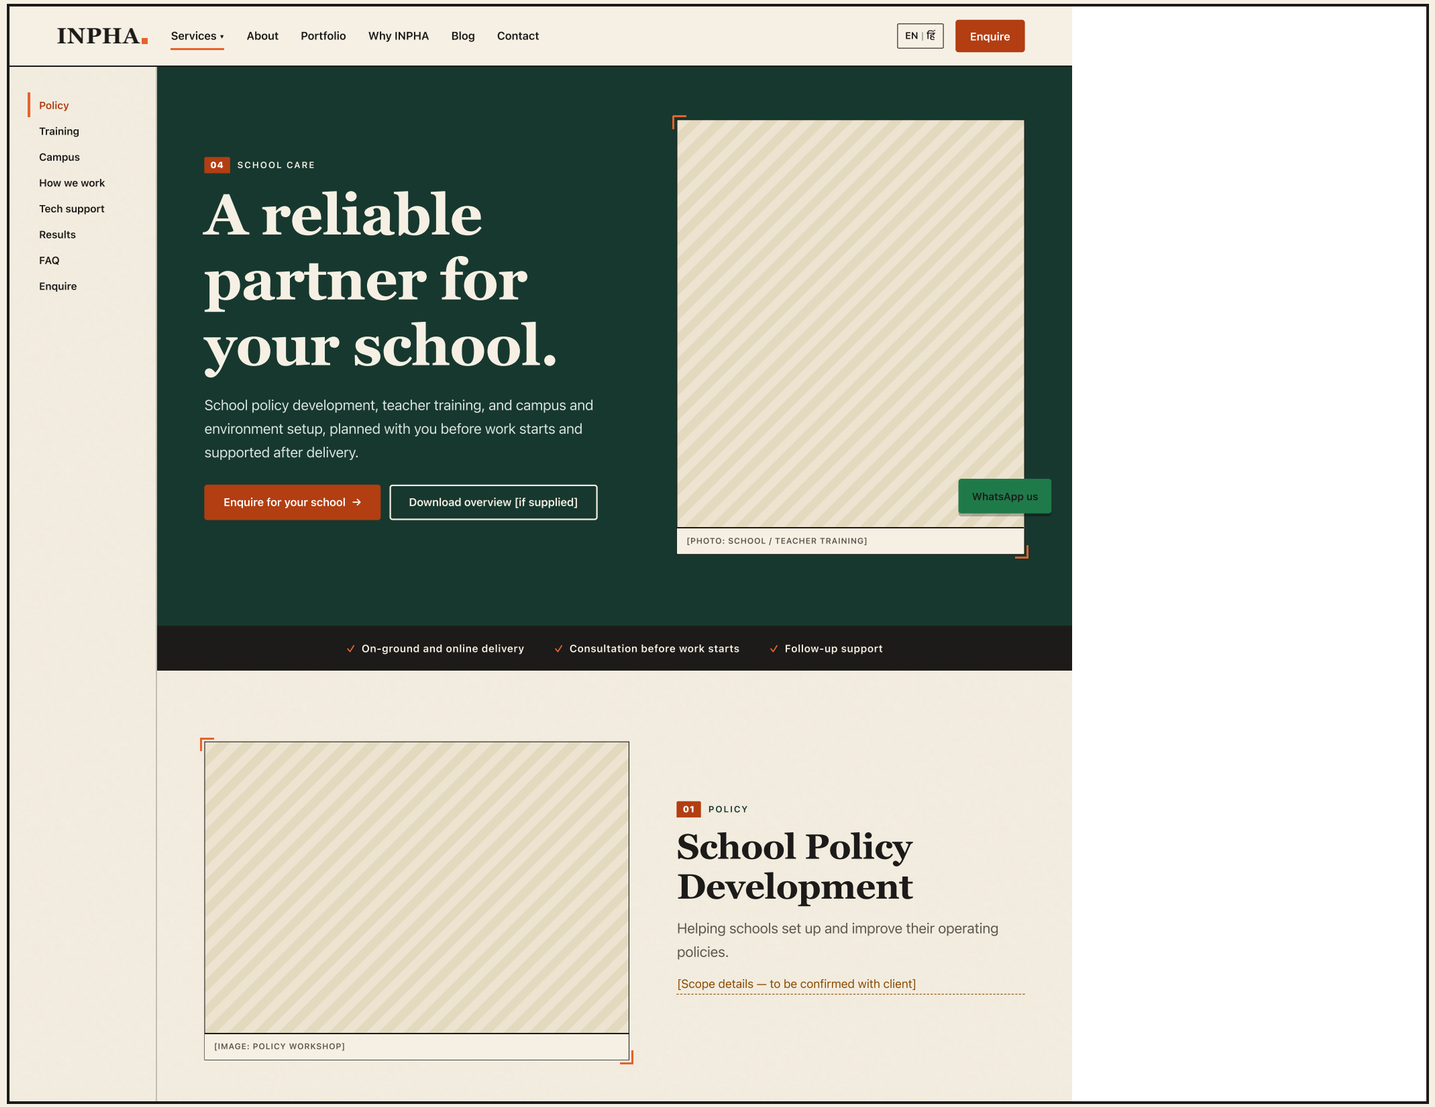

07 SCHOOL CARE PAGE CONCEPT

The deepest page on the site.

A chaptered long-form page with a side index: Policy → Training → Campus → How we work → Tech support → Results → FAQ → Enquiry.

The school enquiry form asks only what the brief specifies: school name, city, number of students, contact details.

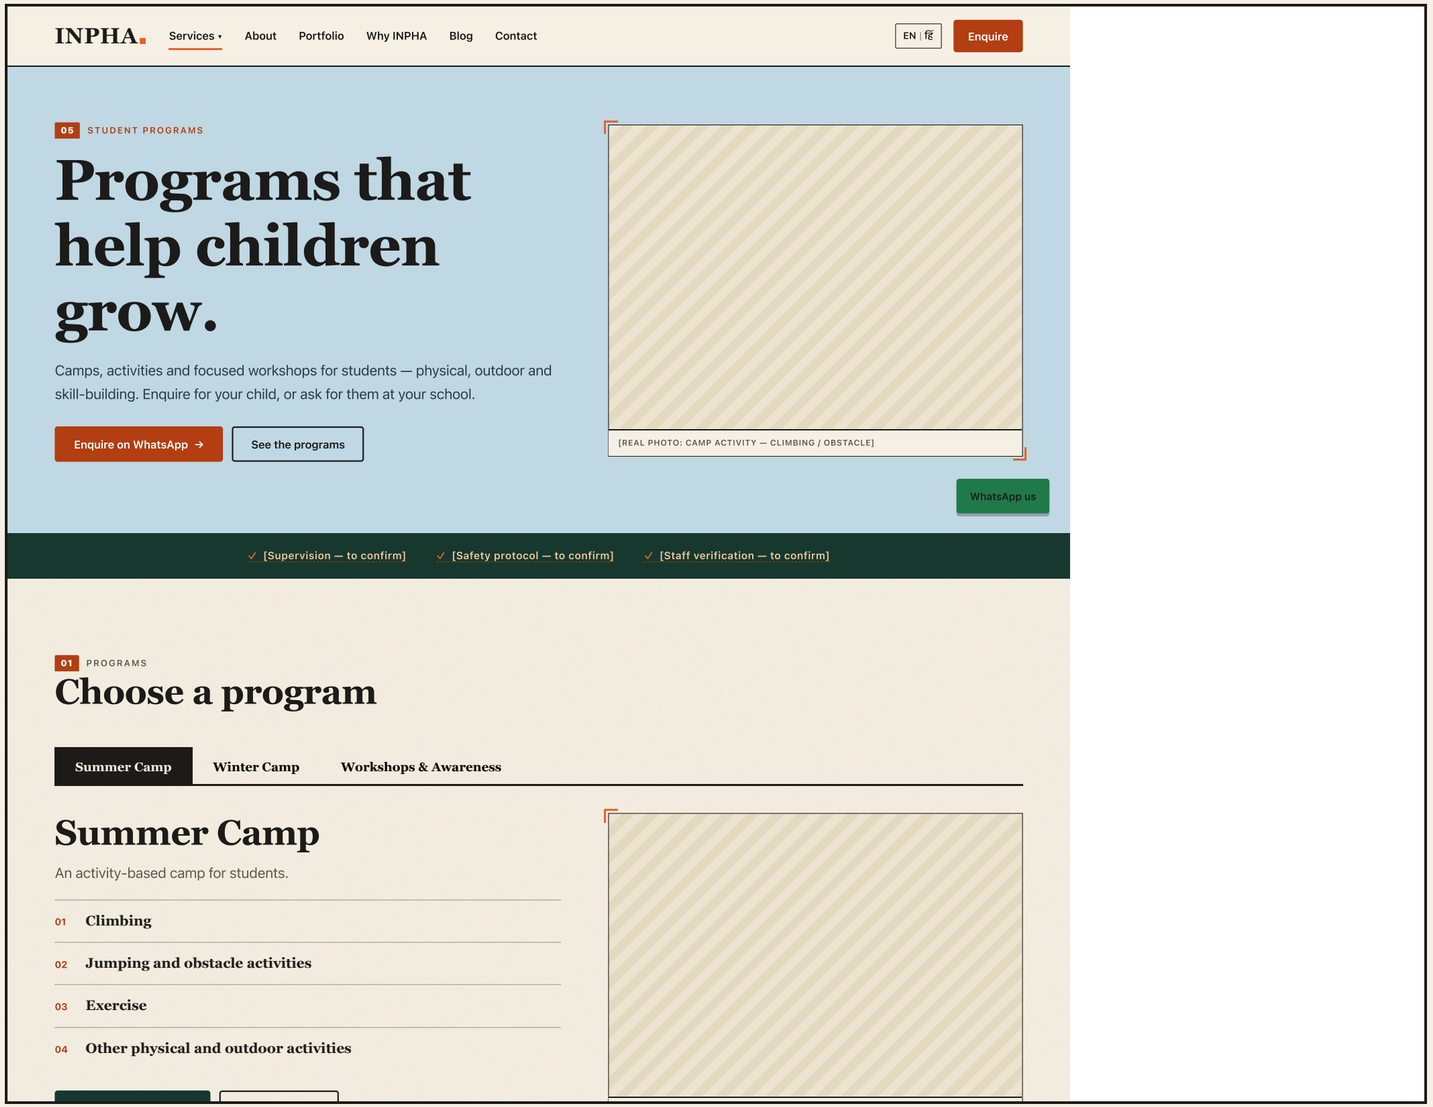

08 STUDENT PROGRAMS PAGE CONCEPT

Built for parents' first question.

The hero is calmer (sky) and the safety strip sits right below it. Programs are tabbed (Summer, Winter, Workshops). The nine workshop topics are a scannable index.

Age groups, safety details and photos are clearly marked placeholders.

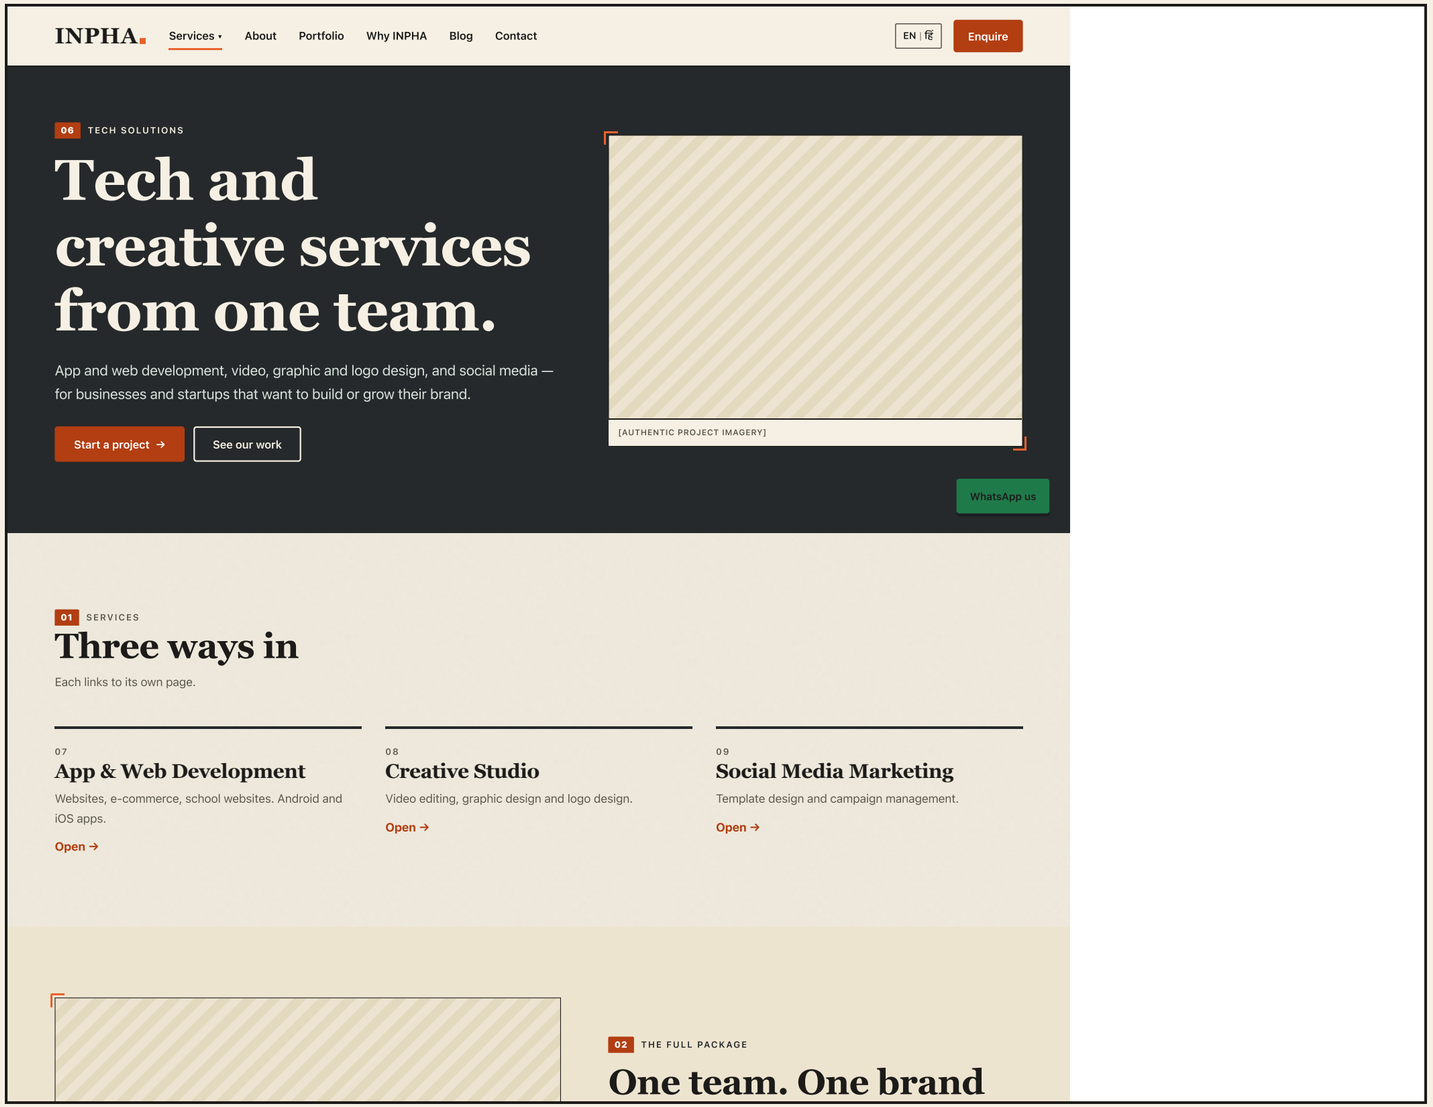

09 TECH SOLUTIONS PAGE CONCEPT

Crisper, for business.

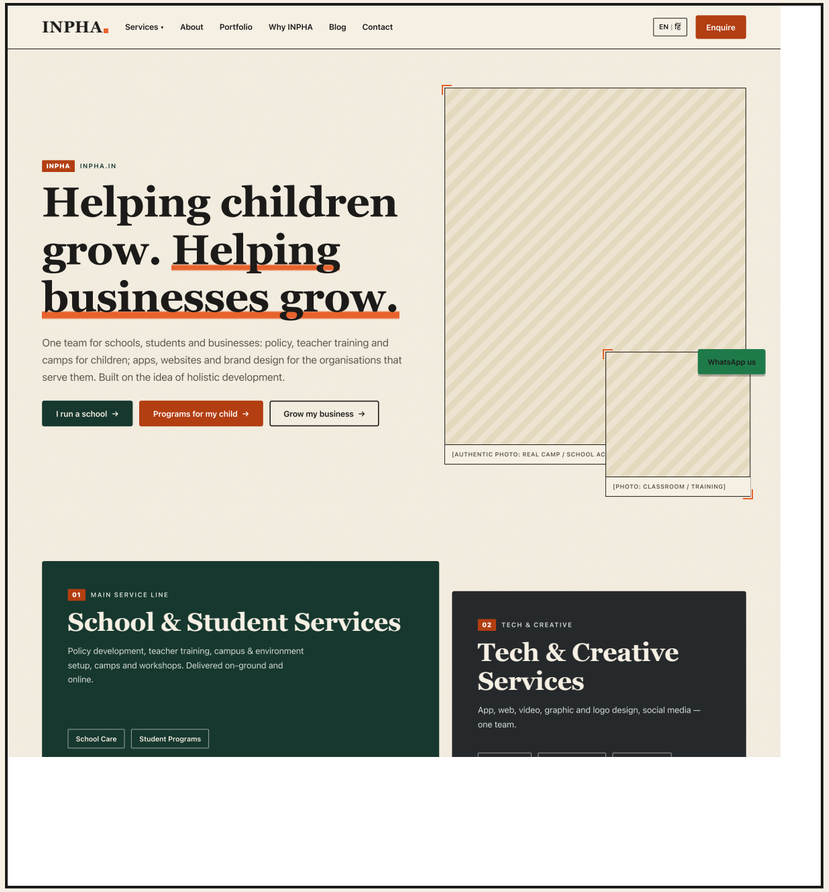

Same system, graphite tones, more grid. Three ways in (App & Web, Creative Studio, Social Media), the "one team" benefit, the five-step process and featured projects.

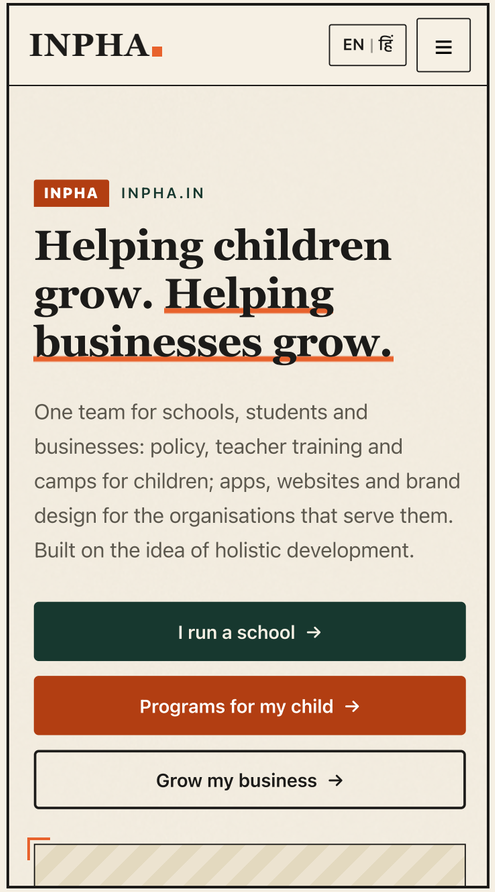

Projects use one case structure: need, work, result, never invented.

10 MOBILE AND DESKTOP RESPONSIVENESS

One layout that reflows. Not a shrunk desktop.

Rules

Mobile 390 · Tablet 820 · Desktop 1440. Same order everywhere.

Call · WhatsApp · Enquire bar on phones. 44px+ touch targets. Hindi: no fixed heights, line-height 1.6+, longer labels tested.

Few components, used consistently.

Components

Buttons (3), chips, index tag, header + Services menu, footer, ruled column, case card, image frame, steps, FAQ, tabs, forms with states, gallery.

Built in plain code

CSS custom properties, container queries, native <details> for FAQs, SVG route line, Google Fonts. No heavy effects.

Prototype

The review board is itself working HTML/CSS, which shows the layouts are real, not a mockup. It is not the production site.

12 NEXT STEPS AND APPROVAL CHECKPOINTS

Where we are, what is needed.

Stage 1 UX
approved

Stage 2 Wireframes
approved

Stage 3 UI
awaiting approval

Stage 4 Handoff
after approval

Needed from the client

Final logo · confirmed service wording (social media) · real photos and videos · numbers · testimonials · team photos and bios · portfolio samples · camp age groups and safety details · contact details · legal text.

Decisions today

Approve the direction, palette and type · confirm the menu structure · confirm EN + HI scope for build.
